

HEAD LICE

From the Parent Handbook

Camp Ramah has hired a Professional Lice Removing Company to evaluate every head for lice at no charge to families or staff. In the event that treatment is needed, the company and our staff will treat the camper or staff in a respectful, kind, and caring manner. The treatment, depending on severity of infestation, will include 2-3 treatments over the span of days. The products used are organic, safe, and effective. If lice are found on your camper or staff, then treatment will be required, and there will be an incurred cost to the family of \$270 per head (includes all treatments and products). After treatment, the camper or staff will return to regular activities until the next lice treatment. Please take the time to check your child's head prior to coming to camp and inform them that having treatment for lice removal is common, painless, and that campers are back in action in no time.
